TECHNICAL DATASHEET COBRAFLEX

Preformed Flexible plasterboard - thickness 6mm

CobraFlex
Flexible Sheet

CHARACTERISTIC	VALUE	MEASUREMENT UNIT	NORM
Description	Preformed panel with concave or convex shaping, essential for applications with the COBRAKit Ceiling and COBRAKit Wall curved metal structure.	-	-
Composition	Layer of gypsum with specific additives, embedded between two sheets of special high-strength cardboard.	-	-
TYPE	A	-	EN 520
Thickness	6mm - thinned edge	mm	-
Dimensions	1,20 X 1,00 1pc= 1,20m ²	Meter/ m ²	-
Weight	6,45Kg/pz. (±2)	Kg	-
Fire reaction class	A2	-	EN13501-1
Storage	Protect from weather elements		
Pallet dimensions: 100x120x75h - content: 100pcs. - Pallet weight: 658 kg The Cobraflex sheets are laid flat on the pallet and are ready to be bent without any additional processing.			
PHOTOGRAPHIC RELEASE			
   			
NOTE: Depending on the complexity of the realization, it would be advisable to connect the ends of the "COBRAFLEX" panels with a small segment of metal profile to avoid imperfections.
